

Naturally Sweetened Cream Cheese Frosting

Author: Cookie and Kate Prep Time: 10 minutes Total Time: 10 minutes

Yield: 4 cup 2x Category: Frosting Method: Whipped Cuisine: American

★★★★★ 4.8 from 29 reviews

Learn how to make naturally sweetened cream cheese frosting! It's so easy. This recipe as written yields 2 cups, or enough frosting for one 9" round or square cake layer, or 12 cupcakes. Multiply as needed (times two for a double-layer cake or 9×13" sheet cake, and so on).

SCALE 1x 2x 3x

INGREDIENTS

- 36 Medjool dates (about 3 cup firmly packed)
- 1 cup room temperature water, plus hot water for soaking
- 2 teaspoon vanilla extract
- Small pinch of salt (x2)
- 16 ounce cream cheese
- 4 tablespoon unsalted butter

SHOP INGREDIENTS

Save recipes, create shopping lists, meal plans and more.

INSTRUCTIONS

1. To prepare, pull the cream cheese and butter out of the fridge so they have a few minutes to warm up. Slice the cream cheese into quarters and set aside.
2. Place the dates in a heatproof bowl and pour hot water over them until they are covered (this ensures that the dates are hydrated and soft enough to blend—don't skip this step!). Let them soak for 10 minutes, then drain.
3. Once the dates are cool enough to handle, remove the pits and discard them. In a food processor, combine the pitted dates, 1/2 cup room temperature water, vanilla, and a little pinch of salt.
4. Process until the date mixture is quite smooth, about 1 to 2 minutes, pausing to scrape down the sides as necessary. Then, add the cream cheese and butter and blend until smooth and fluffy.
5. Use the frosting immediately, or store it in the refrigerator, covered, for up to 5 days. Before using, let it warm to room temperature for about 15 minutes and briefly rewhip before using.

NOTES

Chocolate version: For chocolate cream cheese frosting, blend in 1/3 cup cocoa powder with the cream cheese and butter.
